

Hassan Allam Construction Awarded New Contract for Cairo Metro Line 4

As part of the consortium of Hassan Allam Construction, Arab Contractors, Petrojet and Concord, the award marks an important milestone for Hassan Allam Holding in the transportation sector, attesting to its leading capabilities in seamlessly executing strategic national megaprojects.

Cairo, November 23rd 2020

Hassan Allam Holding (HAH), a leading construction and engineering group headquartered in Cairo, Egypt, serving regional and global clients in the Middle East and North Africa, announced today that its subsidiary Hassan Allam Construction has secured a new contract for construction works as part of the first phase of the Metro line 4. The National Authority of Tunneling had awarded this contract to the consortium of Hassan Allam Construction, Arab Contractors, Petrojet and Concord. The signing ceremony was attended by the Minister of Transportation, Major General Kamel Al Wazeer and signed by Dr. Essam Waly, President of the National Authority for Tunnels and Hassan Allam, CEO of Hassan Allam Holding.

“This project bookends a series of successful contracts signed to complete some of Egypt’s most crucial infrastructure, attesting to our ability to deliver key national projects on time and to specification, and solidifying our position as the partner of choice for strategic megaprojects,” said Hassan Allam, CEO Hassan Allam Holding. “We are committed to continuously undertaking new projects that will enhance and develop infrastructure across Egypt.”

The scope of work of the consortium will include 12 Metro stations starting from Hadaek Al Ashgar at Six of October City till El Mesaha station at Al Haram Street. The Overall length of this stage is 13.7 kilometers. 11 stations will be constructed underground using the top-down construction method and connected by 19.6 kilometers of double concrete tunnels, with an internal diameter of 5.8 meter each. The scope of work will also include all civil works, mechanical, electrical, plumbing, and architectural works.

“After the completion of the first phase, the line will be able to accommodate 258 trains in each direction, with the number growing to 492 by 2050 upon the completion of the two phases,” said Mohamed El Dahshoury, Hassan Allam Construction CEO. “The new line is set to drastically enhance Egypt’s public transportation network and will have a tremendous impact on the country’s urban development and sustainability goals, in line with the government’s 2030 sustainable development strategy.”

Hassan Allam Holding has long been the construction partner of choice for national strategic projects across multiple spaces. In October 2019, Hassan Allam Holding began construction on Egypt’s first Light Rail Transit system, linking 10th of Ramadan City and the New Administrative Capital, which will transport more than 1 million passengers each day.
