

Infinity and SODIC Sign Collaboration Agreement for Installing EV Charging Stations

Cairo, Egypt - 20 November 2023

Infinity, Egypt's foremost renewable energy and electric vehicle charging provider, proudly announced a collaboration agreement with SODIC, a leading real estate developer, to deploy Electric Vehicle (EV) charging stations across all SODIC's developments.

The expansion plans for Infinity's EV charging infrastructure have been advancing simultaneously in both public areas and gated communities. This strategic partnership with SODIC perfectly aligns with Infinity's vision. By pursuing this approach, Infinity intends to cater to SODIC's existing electric vehicle users while also supporting potential EV users residing in these communities. This collaboration aims to contribute to a greener and more sustainable future for transportation.

Infinity's commitment to sustainability will be instrumental in reinforcing SODIC's efforts to implement eco-friendly practices across their operations, reducing carbon emissions, and creating intelligent communities that offer a superior quality amenity for residents.

The signing ceremony, attended by esteemed dignitaries including Ayman Amer, SODIC's General Manager, and Shams Abdel Ghaffar, Managing Director of Infinity's EV Division, marked the official commencement of this exciting partnership.

Mr. Shams Abdel Ghaffar, Managing Director of Infinity EV Division, commented on the partnership, saying: "We are happy to join hands with SODIC, a visionary leader in real estate development. This collaboration marks another important step for Infinity in our journey of partnering with prominent real estate developers as we work towards our mission of expanding our EV charging infrastructure across Egypt."

Ayman Amer, SODIC's General Manager, added: "We are excited to partner with Infinity, with its strong and proven track record. This strategic partnership comes in line with our customer-focused approach to offer sustainable solutions to our residents that greatly improve their day-to-day experience and overall quality of life."

Infinity has been a pioneer in the Egyptian EV charging industry since 2018. With a steadfast focus on building a robust EV charging infrastructure, the company has successfully established the largest and fastest-growing EV charging network in the country. Presently, Infinity boasts an impressive network of over 150 charging stations with more than 550 charging points across Egypt, and has ambitious expansion plans in place at both, local and regional levels.

Through such collaborations, Infinity is well-positioned to play a vital role in evolving Egypt's real estate and renewable energy landscape, working collaboratively to create a more sustainable and greener future for the country and its citizens.

About Infinity

Established in 2014, Infinity is the only Egyptian dedicated renewable energy solutions provider in the country that develops clean energy solutions across several sectors and scales. For nearly a decade, Infinity has been leading the shift to a sustainable future for Egypt and Africa, through meticulously developed, commercially viable energy solutions that provide efficient and sustainable access to energy resources for everyone. Infinity has so far, invested in projects with total investment size of around USD 350 million representing almost 236 MWp capacity across six utility-scale operational projects.

Infinity harnesses different resources for Power Generation – solar, wind and waste-to-energy while also providing Power Distribution services and Electric Vehicle (EV) charging solutions across three categories: cities and infrastructure, commercial and industrial and homes. Infinity also provides comprehensive EPC services including designing, procuring, constructing, commissioning power plants and solar solutions for carports and rooftops, as well as O&M services that help solar energy asset owners maximize returns. Infinity's Asset Management Services ensure the optimization of administration and financial management throughout the project lifecycle. Infinity is the largest Egyptian contributor to the Benban Solar Park, Africa's largest photovoltaic power station with an estimated capacity of 1465 MWp.

Since 2018, Infinity has undertaken the extensive task of establishing Egypt and Africa's most extensive EV charging network, featuring over 150 charging stations and 550 charging points spread across 12 governorates. These stations are strategically positioned at key locations, including select gas stations and others, high-traffic commercial districts, shopping malls, gated communities, long distance travel routes, major cities in the Delta region and Assiut and Aswan as well. Infinity's EV charging network has an ambitious growth trajectory, with plans to reach 1000 charging points by 2024, solidifying its position as the leader in electric vehicle charging infrastructure in Egypt and Africa.
