## Siemens Energy appoints Hussein Shoukry as Managing Director for the Middle East and Africa

Siemens Energy has appointed Hussein Shoukry as the Managing Director for the Middle East and Africa, effective December 1, 2025. He succeeds Dietmar Siersdorfer who will retire after a distinguished career of nearly four decades with the company.

As Managing Director, Hussein will be based in the UAE and will oversee the company's operations and strategic initiatives across a regional footprint that spans 29 offices, employs more than 4,000 people, and recorded EUR 9 billion in order intake in fiscal year 2025.

"Rising energy demand is reshaping the future of both the Middle East and Africa," Hussein said. "In the Middle East, countries are embracing a diversified energy mix and building localized supply chains, while in Africa the priority is expanding reliable electricity access for millions. The region also includes markets where critical energy infrastructure is being rebuilt or modernized."

"With our broad portfolio in energy technology and long-standing presence, Siemens Energy will remain a committed partner in meeting these needs and strengthening the resilience of the Middle East and Africa's energy systems."

Hussein brings extensive experience in leading complex energy projects and strengthening global execution capabilities to his new role. Since joining the company in 2003, he has held several leadership positions, most recently serving as the Senior Vice President for Project Execution, where he led a team of over 3,500 and oversaw Siemens Energy's global Competence Centers in Romania, Mexico, and India.

Hussein holds a degree in Construction Engineering from the American University in Cairo. His engineering background, project execution expertise, and familiarity with diverse energy markets –

**Siemens Energy** is one of the world's leading energy technology companies. The company works with its customers and partners on energy systems for the future, thus supporting the transition to a more sustainable world. With its portfolio of products, solutions and services, Siemens Energy covers almost the entire energy value chain – from power and heat generation and transmission to storage. The portfolio includes conventional and renewable energy technology, such as gas and steam turbines, hybrid power plants operated with hydrogen, and power generators and transformers. Its wind power subsidiary Siemens Gamesa makes Siemens Energy a global market leader in renewable energies. An estimated one-sixth of the electricity generated worldwide is based on technologies from Siemens Energy. Siemens Energy employs around 103,000 people worldwide in more than 90 countries and generated revenue of €39.1 billion in fiscal year 2025. [www.siemens-energy.com](http://www.siemens-energy.com)
