Non-GAAP Financial Measures and Key Business Metrics

Consolidated financial information has been presented in accordance with US GAAP ("GAAP") as well as on a non-GAAP basis to supplement our consolidated financial results. Lucid's non-GAAP financial measures include Adjusted EBITDA, Adjusted Net Loss Attributable to Common Stockholders, Adjusted Net Loss Per Share Attributable to Common Stockholders, and Free Cash Flow, which are discussed below.

Adjusted EBITDA is defined as net loss attributable to common stockholders before (1) interest expense, (2) interest income, (3) provision for income taxes, (4) depreciation and amortization, (5) stock-based compensation, (6) restructuring charges, (7) change in fair value of common stock warrant liability, (8) change in fair value of equity securities of a related party, (9) change in fair value of derivative liabilities associated with redeemable convertible preferred stock (related party), and (10) accretion of redeemable convertible preferred stock (related party). Lucid believes that Adjusted EBITDA provides useful information to Lucid's management and investors about Lucid's financial performance.

Adjusted Net Loss Attributable to Common Stockholders is defined as net loss attributable to common stockholders excluding (1) stock-based compensation, (2) restructuring charges, (3) change in fair value of common stock warrant liability, (4) change in fair value of equity securities of a related party, (5) change in fair value of derivative liabilities associated with redeemable convertible preferred stock (related party), and (6) accretion of redeemable convertible preferred stock (related party).

Lucid defines and calculates Adjusted Net Loss Per Share Attributable to Common Stockholders as Adjusted Net Loss Attributable to Common Stockholders divided by weighted-average shares outstanding attributable to common stockholders.

Lucid believes that Adjusted Net Loss Attributable to Common Stockholders and Adjusted Net Loss Per Share Attributable to Common Stockholders financial measures provide investors with useful information to evaluate performance of its business excluding items not reflecting ongoing operating activities.

Free Cash Flow is defined as net cash used in operating activities less capital expenditures. Lucid believes that Free Cash Flow provides useful information to Lucid's management and investors about the amount of cash generated by the business after necessary capital expenditures.

These non-GAAP financial measures facilitate management's internal comparisons to Lucid's historical performance. Management believes that it is useful to supplement its GAAP financial statements with this non-GAAP information because management uses such information internally for its operating, budgeting, and financial planning purposes. Management also believes that presentation of the non-GAAP financial measures provides useful information to Lucid's investors regarding measures of our financial condition and results of operations that Lucid uses to run the business and therefore allows investors to better understand Lucid's performance. However, these non-GAAP financial and key performance measures have limitations as analytical tools and you should not consider them in isolation or as substitutes for analysis of our results as reported under GAAP.

Non-GAAP information is not prepared under a comprehensive set of accounting rules and therefore, should only be read in conjunction with financial information reported under GAAP when understanding Lucid's operating performance. In addition, other companies, including companies in Lucid's industry, may calculate non-GAAP financial measures and key performance measures differently or may use other measures to evaluate their performance, all of which could reduce the usefulness of Lucid's non-GAAP financial measures and key performance measures as tools for comparison. A reconciliation between GAAP and non-GAAP financial information is presented below.
