

RSG & AIRSAT Announce Strategic Partnership in Saudi Arabia... Strengthening Leadership & Joint Expertise in Earth Observation (EO)

Riyadh, Saudi Arabia, 20 May 2025 – AIRSAT Technology Group Limited, a leading Chinese provider of high-resolution Earth Observation (EO) satellite solutions, announced a strategic partnership with Rock Solid Group, a multidisciplinary technology company based in the Kingdom of Saudi Arabia. This agreement is a key step forward in AIRSAT's worldwide expansion plan, as it aims to increase its presence in the Saudi commercial space and technology markets. With a constellation of high-resolution satellites, AIRSAT has built a reputation for dependability, innovation, and mission-critical data services.

Rock Solid Group will be a strategic partner and integrator in this partnership, leveraging its deep-rooted presence and technical knowledge in Saudi Arabia to promote AIRSAT's satellite services across important government and commercial sectors. The relationship is consistent with Saudi Arabia's Vision 2030 strategy, which prioritizes digital transformation, space technology, and environmental sustainability.

"This partnership with Rock Solid Group is a pivotal step in our efforts to grow within the Saudi market and support regional innovation with advanced satellite data capabilities," stated **Mr. Brian Zhou Boyang, Corporate VP** of AIRSAT Technology Group. *"Saudi Arabia presents an exciting opportunity for Earth Observation applications, and we are committed to delivering cutting-edge solutions that meet the dynamic needs of this market."*

Mr. Marc Mouawad, CEO of Rock Solid Group, stated, *"We are proud to collaborate with AIRSAT Technology Group, whose EO satellite technology represents some of the most advanced capabilities in the global market." Together, we hope to create innovative solutions that support smart infrastructure development, environmental protection, and Saudi Arabia's Vision 2030."*

The agreement includes the formation of joint initiatives centered on localized services, data analytics, value-added services, and long-term collaboration plans. Both companies plan to explore additional opportunities to support the regional ecosystem through education, training, and strategic investments.

The signing ceremony was attended by ICAD's Group CEO Mr. Ghassan Al Sayegh, Mrs. Ke Wang - Founding Partner of Timenschen Fund and Founder of Timenschen Institute, and respective dignitaries and guests.

About AIRSAT Technology Group Limited

AIRSAT operates the AIRSAT Constellation, a multi-mode Earth Observation (EO) satellite network comprising high-resolution Synthetic Aperture Radar (SAR) and Optical Satellites. The company provides EO imagery and value-added services to global clients across various sectors, including ecological resource monitoring, energy, smart cities, disaster prevention and mitigation, emergency response, security, and maritime surveillance and planning.
