

Hassan Allam Construction and Metito Join Forces to Upgrade Alexandria's Water Future with Major Wastewater Treatment Plant Expansion

- The Alexandria West Wastewater Treatment Plant capacity once complete will expand to 600,000 m³/day

(Cairo, Egypt – Date) Hassan Allam Holding is proud to announce that its subsidiary, Hassan Allam Construction, in joint venture with Metito, has been awarded the Alexandria West Wastewater Treatment Plant – Extension & Upgrade Project, located in West Alexandria, Egypt.

The Alexandria West Wastewater Treatment Plant is a cornerstone of Alexandria's wastewater management system, serving millions of residents. The upgrade and expansion project will play a strategic role in meeting the region's growing wastewater treatment needs and aligning with Egypt's national goals for environmental protection and water sustainability.

The project scope involves upgrading the plant from primary to secondary treatment, incorporating advanced sludge digestion and biogas generation systems, refurbishing existing facilities, and constructing new treatment units. Once complete, the plant's capacity will expand to 600,000 m³/day, ensuring compliance with national effluent standards and promoting environmental resilience for surrounding communities.

Mohamed El Dahshoury, CEO of Hassan Allam Construction, said: “This project marks an important contribution to Egypt's water security and environmental sustainability. It draws on our extensive national and regional expertise in water infrastructure to deliver a facility that integrates advanced treatment technologies, enhances operational efficiency, and minimizes environmental impact. Through our collaboration with Metito, we are advancing a project of national significance—expanding Alexandria's capacity to manage wastewater, safeguarding vital ecosystems, and setting a model for sustainable water infrastructure across the broader MENA region.”

Karim Madwar, CEO Metito, said: “The awarding of the Alex West Wastewater Treatment Plant project is not just a business milestone—it is a critical contribution to Egypt's environmental resilience and water sustainability. This plant will play a key role in treating wastewater to the highest standards, reducing pollution, protecting the Mediterranean coastline, and supporting the reuse of treated water for agriculture and other non-potable uses. At Metito, we are proud to join forces with Hassan Allam Construction on this strategic effort to preserve natural resources and build a greener, more sustainable future for generations to come.”
