

Best Projects in the 2026 ENR Global Best Projects Awards.

Hassan Allam Holding is proud to announce that two projects delivered by Hassan Allam Construction have been recognized as Best Projects in the 2026 ENR Global Best Projects Awards.

In the Water/Wastewater category, the 6th of October Purification Plant, Phases 1 & 3 in Egypt, has been named Best Project. Phase III alone has a capacity of 400,000 m³/day, supporting the delivery of clean, safe water to one of Egypt's rapidly growing urban areas.

In the Education/Research category, the KAUST Coral Reef Initiative in Saudi Arabia has also been recognized as Best Project. Delivered as a turnkey project, the scope includes the primary coral nursery facility, boat jetty and marina, alongside the integration of a specialized Life Support System supporting coral propagation and reef restoration.

These recognitions reflect the expertise, collaboration, and commitment of our teams in delivering complex projects that create lasting impact across communities and environments.
