### 1Q2026

The Group reported 7% Y-o-Y increase in revenues to reach AED6.6 billion, supported by NMDC Energy's strong revenue growth, with its revenues contributing 75% of the Group revenues. Moreover, 81% of the Group's revenues was generated from the UAE and 19% from International markets.

It is important to note, that given the geopolitical situation in the region several reasons adversely impacted the Group profitability and profit margin, these include costs related logistics, insurance and fuel prices which were fully recognized during 1Q26 together with an increase in the forecasted cost of completion (EAC). Moreover, costs overruns and idle hours of operations delayed revenue recognition and extended projects timeline.

Group EBITDA and EBITDA margin declined to AED684 million and 10.3%, respectively; on the back of slim margins reported by Energy business unit and lower revenues reported by Dredging & Marine (D&M) business unit.

Consequently, net profit after tax came at AED387 million, and net profit margin stood at 5.8% in 1Q26. With NMDC D&M enjoying higher margins, 79% of the Group's net profit was generated by NMDC D&M and the remaining 21% by NMDC Energy.
